

Air Products

In the Sultanate of Oman

Air Products is a world-leading Industrial Gases company with over 80 years of experience. We provide atmospheric and process gases and related equipment to manufacturing markets, including refining and petrochemical, metals, electronics, and food and beverage for customers around the globe.

Our Total Safety Values

We are a leader in **safety** and the **environment**, in **sustainability** and **community action**, in **ethical behavior** and **corporate governance**.

We offer a unique portfolio of products, services and modes of supply, providing LIN, LOX, LAR, LCO₂, LPG, bulk propane, specialty gases, medical gases, industrial gases and food grade gases in the region.

Hydrogen and the Energy Transition

Building a cleaner, more sustainable energy future is one of the most critical issues facing our world today. The promise of renewable energy and electrification is real, but that alone cannot accommodate all the needs of daily living in the 21st century, while simultaneously growing our economy and achieving our climate goals.

That's where hydrogen comes in.

At Air Products, we believe we have a **higher purpose**, and that's to bring people together to collaborate and innovate solutions to the world's most significant energy and environmental sustainability challenges.

The hydrogen fuel that we supply and distribute is used across the globe and in a diverse range of applications, boosting efficiency and productivity and safeguarding our planet.

Hydrogen fueling for automobiles

Hydrogen fueling for buses

Hydrogen fueling for marine

Hydrogen fueling for power generation

Hydrogen fueling for rail transportation

Hydrogen fueling for forklifts & goods transport

Generating a Cleaner Future

As we look forward, we see significant opportunities for gasification, carbon capture technologies and hydrogen for mobility and energy transition. These are opportunities to solve today's and tomorrow's energy and environmental challenges, and we are driven by an important ambition – to innovate alongside our customers to help make these opportunities a reality.

Seifi Ghasemi

Chairman, President and Chief Executive Officer of Air Products

Hydrogen for stations can be delivered to a site via truck or pipeline, produced by natural gas reformation, biomass conversion, or by electrolysis including electrolysis that is solar and wind driven (green hydrogen).

- ✓ Decades of hydrogen production and distribution experience
- ✓ Key trucking and bus transit applications
- ✓ Providing safer, more reliable, and cost effective solutions

Our Industrial Gases

We Have What YOU Need!

We deliver a full range of industrial gas products, serving key customers in metal fabrication, oil and gas, healthcare, food and other markets.

Argon

Unique inerting properties to improve quality, optimize performance, and reduce costs.

Carbon Dioxide

Benefit from carbon dioxide's inert properties, as well as its cooling and freezing abilities.

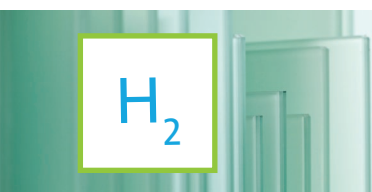

Carbon Monoxide

Used in the production of chemicals ranging from acetic acid to polycarbonates to polyurethane intermediates.

Helium

As a gas for lifting, leak detection, shielding, its inert properties and as a liquid for cooling.

Hydrogen

Valued for its reactive and protective properties to improve quality, optimize performance and reduce costs.

Nitrogen

Widely used as a gas for its inert properties and a liquid for cooling and freezing.

Oxygen

Known primarily as a respiratory gas by the healthcare industry, but also used for combustion, oxidation, and fermentation.

Rare Gases

Neon, Krypton, and Xenon used in technical applications including the electronics industry.

Food Gases

From MAP cylinders to bulk liquid nitrogen, we can provide all the gases for your food processes.

Syngas

Providing turnkey solutions to convert hydrocarbon feedstock into synthesis gas for high-value products and power.

Specialty Gases

Ultra high purity (99.995% and above) for analytical, pharmaceutical, electronics and petrochemical industries.

Welding & Cutting Gases

A full range of high performance and industry standard welding gases for all your needs.

Which gas do you need?

Supply Methods

Pipeline, Bulk and Packaged Gases

In Oman, we pride ourselves on having in house production capabilities, providing GOX, GAN, LOX, LIN, LAR and LCO₂ to our customers through a number of different supply modes including **pipeline, bulk and packaged gases**.

We provide a **secure**,
uninterrupted
supply to meet
your production
requirements across
the entire country.

Reach out to our experts to find out which supply method works best for your demands and needs!

Technical Solutions Engineering and Project Execution

Engineering

We are one of the Sultanate's best contractors engaged in the specialized activity of design, supply, installation, commissioning and maintenance of LPG, SNG, Natural Gas, Cryogenic & Industrial Gas distribution systems.

Safety
is always our

#1

priority

Project Execution

As your gas partner, we will work with you from initial installation to supporting the evolution of your business. Our in-depth knowledge of gases and equipment enables us to offer the best supply modes and technologies, regardless of the application.

Find out how we can make your project a success!

Technical Solutions

Gas Equipment

We offer a full range of gas equipment:

- Storage tanks
- Regulators
- Manifolds
- Air Products Express (APEX) Services — temporary & emergency gas solutions
- Safety devices
- Flow meters
- Vaporizers
- Valves
- Gas detection equipment
- Pumps
- Mass spectrometer

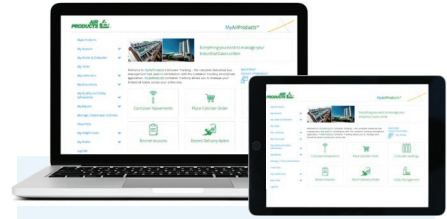

We offer thousands of products and services
to a wide range of industries.
